

SKILLS

Product: JIRA, Trello, Agile, Scrum, User Research, Data Analysis, Prototyping, Usability Testing

Language/Tools: VBA, Java, SQL, HTML/CSS, Git, Figma, Photoshop, AutoCAD, Visio, Teamwork.

EXPERIENCE

Process Optimization Intern – Mattamy Homes | Toronto, ON

January 2019 – April 2019

- Assigned as Product Owner: reduced ERP system (JD Edwards) user data sorting process from 3 hours to 55 seconds by developing automation software in VBA
- Reduced Lot-Plan-Fit (LPF) Exclusion process from 6 hours to 2 hours using VBA to create LPF tool – adopted by enterprise-wide Architecture and Optimization teams
- Consulted with country-wide stakeholders to assess, roadmap, prototype and implement 10+ software solutions
- Conducted project management software feasibility research, resulting in department-wide adoption

Project Development Intern – UGE International | Toronto, ON

May 2018 – August 2018

- Developed a 4-component project cost estimation tool (EPT), streamlining cross-departmental project pricing
- Conducted competitive research project and identified 40+ ideal photo-voltaic system clients across Ontario
- Created and optimized 30+ performance reports increasing energy production yield by ~26% using Helioscope for RFP submissions across North American, African, and Asian markets

PROJECTS

Estimated Pricing Tool (EPT) – UGE International

- Developed a cross-department data visualization tool that leverages current and archived pricing data improving future project cost estimation accuracy by over 35% using VBA, Power Queries, and Macros
- Adopted by major departments at UGE Toronto, reducing interdepartmental consultation by 50%
- Implemented and designed UI/UX and created instructional documentation for 30+ employees

Microsoft Product Management Pitch | 3rd Place

- Product Management case competition intended to increase the Surface's post-secondary education market share
- Conducted user and competitive research to identify product pain-points and develop innovation roadmap
- Conceptualized solution estimated to increase target user satisfaction, ranking 1st amongst competing products

Imperium Solar – uwEnergyHacks 2019 | 1st Place

- As Product Manager, created road maps & workflow process by identifying user needs, and coordinated between Data, Design, and Development team

DECA Business Operations Study – Alchemy Coffee

- Conducted a primary research study on a local cafe to gather information and identify client pain-points
- Developed and implemented a social media marketing plan to increase consumer engagement by over 170%

EDUCATION

University of Waterloo – Candidate for BASc. in Management Engineering

2017 – 2022 (expected)

Relevant Courses: Algorithms and Data Structures, Optimization, Database Systems, Organizational Behavior
